Lockups

Vector masters with every letter outlined, so they need no font. Day text is soot, night text is paper. Below 200 px wide, use the compact lockup.

Icons and card

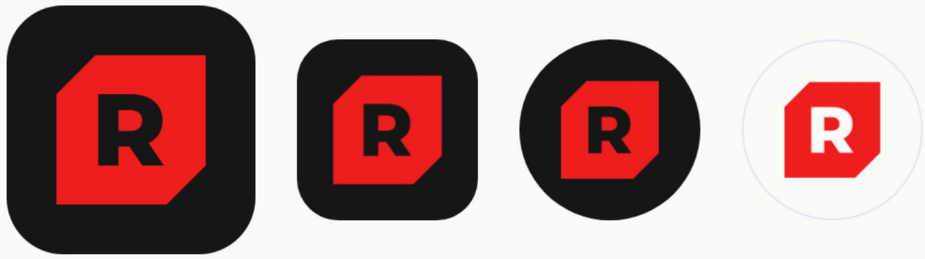

The favicon is the solid tile with no R. From 24 px the R returns. Small sizes use the pixel-snapped cut from the guide: 4 px at 16, 8 px at 32.

Favicon in a browser tab · solid tile, no R · SVG + 16/32 PNG

Pixel snapping · the cut lands on whole pixels

App icon 180 / 512 · avatar 400 · soot ground, mark at 60% and 54%

Business card · front

Tagline and lines

One tagline travels with the logo. The lines are the voice in a single sentence; two are on the shortlist.

TAGLINE · WITH THE LOGO, IN LOCKUPS AND ON MATERIALS

The dice. Not the roll

THE DICE. NOT THE ROLL In lockups it is set in Plex Mono capitals under the wordmark (01).

LINES · SHORTLIST

The human is the loop.

Flips “human in the loop”: the agents work inside the human’s process, not the other way round.

Taste is load-bearing.

A soft, human noun with an engineering predicate. Agents do the lifting; judgment holds the structure up.

Social and link previews

The guide shows only the link preview. The GitHub, X, LinkedIn and post layouts are first drafts: night ground, lockup centred, at least half a tile of clear space.

Link preview (Open Graph) · 1200 × 630

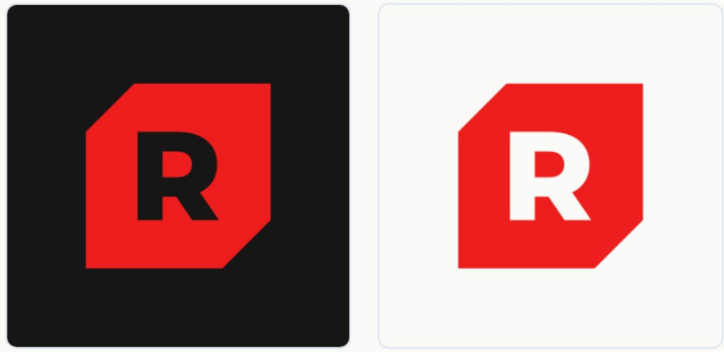

GitHub repo card · 1280 × 640

X header · 1500 × 500

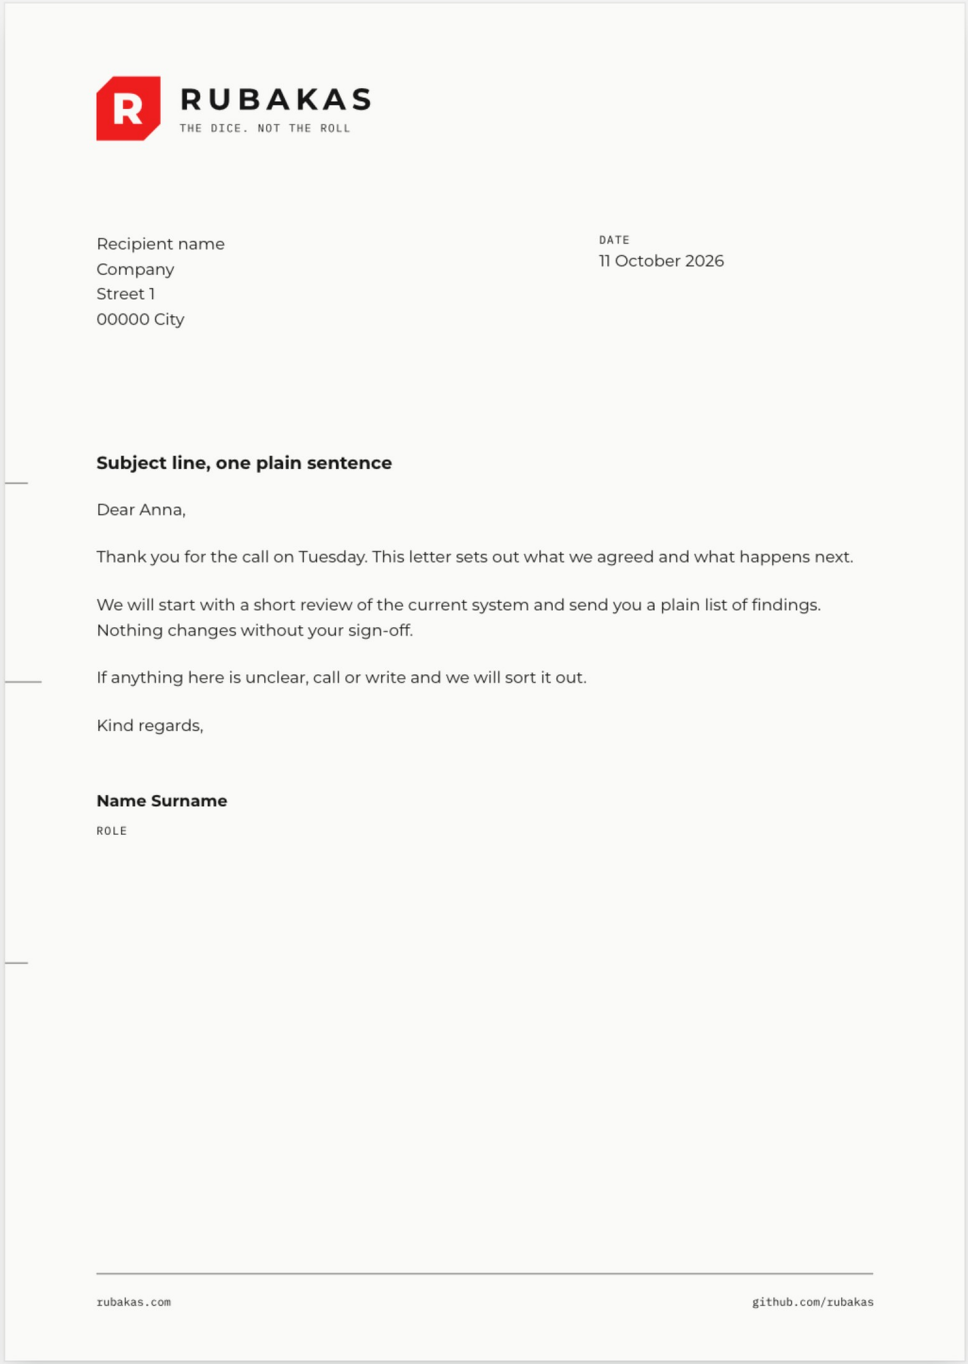

LinkedIn banner · 1128 × 191

Avatar · night (default) and day · 400, square, platforms crop to a circle

Square post · 1080 · stacked lockup

Letterhead

A4 stationery in the guide's own terms: the primary lockup, soot text, red only in the mark. The sample text is a placeholder.

sheet	A4, 210 × 297 mm. Blank artwork and a continuation sheet, as PDF and SVG with every letter outlined
lockup	Primary, 14 mm tall and 59.9 mm wide, 20 mm from the left and 16 mm from the top. Clear space is 7 mm, half a tile
margins	20 mm left and right. Address block at 50 mm, subject at 98 mm, body from 108 mm
type	Montserrat 400, 10 / 15.5 pt, soot. Subject in Montserrat 700. Labels and addresses in Plex Mono
footer	0.15 mm soot rule at 278 mm, with rubakas.com and github.com/rubakas in Plex Mono 7 pt
marks	Fold marks at 105 and 210 mm, punch mark at 148.5 mm (DIN 676)
continuation	Compact lockup, 9 mm tall and 38.5 mm wide, above the 25 mm print minimum
print	White stock, no background fill. Soot and red only. Proof the red before a run

Slide template

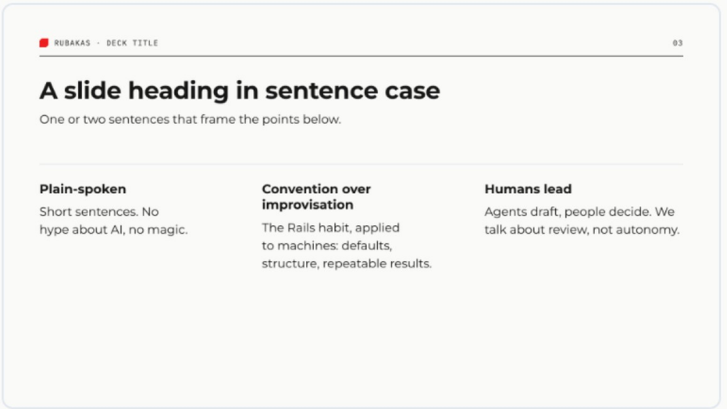

Five layouts at 1920 × 1080 in the guide's page language. The text is sample copy.

Rules

GRID	1920 × 1080. Margins 96 px at the sides, 88 px top and bottom.
TYPE	Titles Montserrat 700, 112 to 136 px. Heading 64, body 32. Labels Plex Mono 20 px capitals.
COLOUR	Soot or paper ground, text the other. Red only in the mark.

Lock-in

The cube wakes, tumbles two turns and locks into the mark. The R stays hidden while it moves and cuts in at the lock with a 4% pulse. For intros, app launch and video idents.

Day · R cuts in at the lock

Night

Keyhole

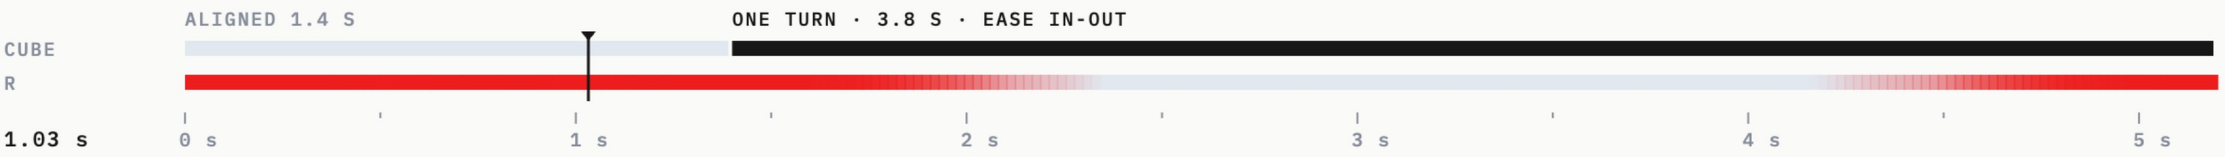

The R is a hole bored through the cube along the logo's line of sight. It reads cleanly at the logo angle, thins into slivers as the cube turns and is shut by about 20°. The R comes into focus.

Day · the R opens only near the logo angle

X-ray · front opening solid, back opening dashed

Keyhole lock-in

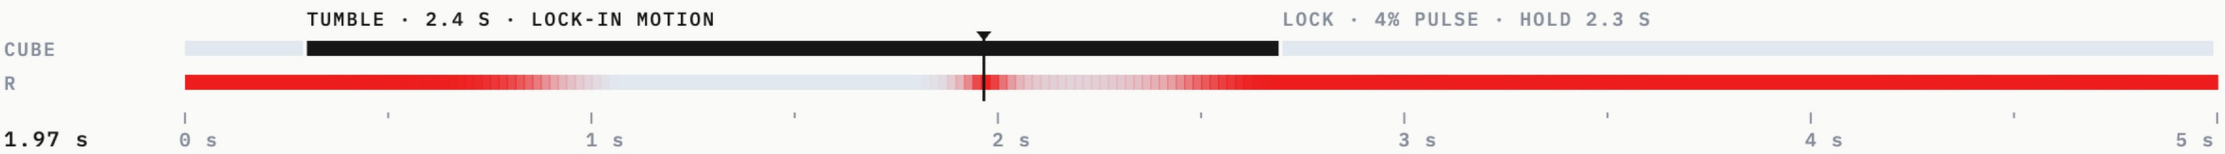

Lock-in's motion with Keyhole's R. The R closes as the cube starts to turn, stays shut through the tumble and focuses back in over the last few degrees of the approach, locking with the pulse.

Day · tunnel on only for the exit and the last 90°

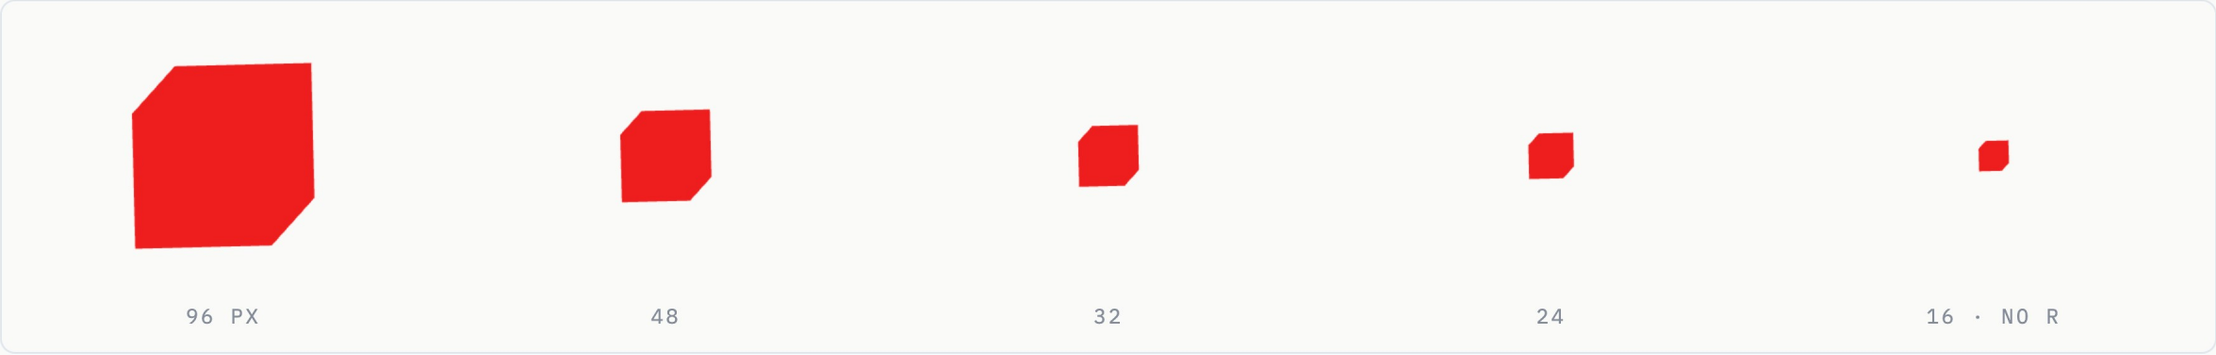

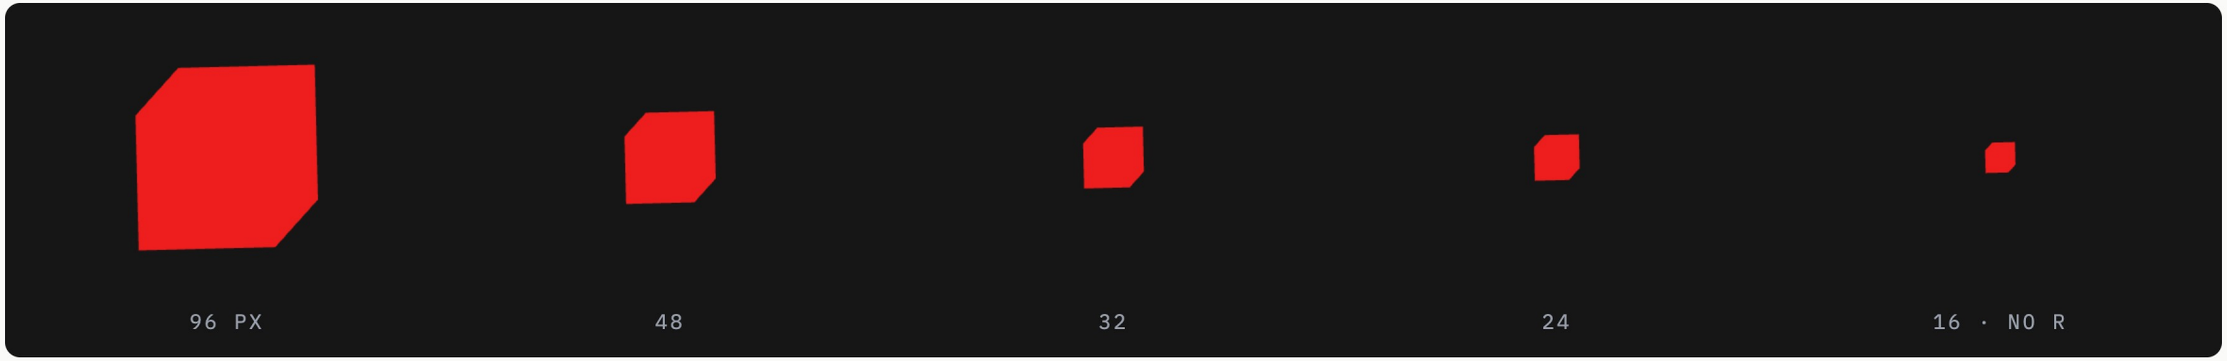

Night

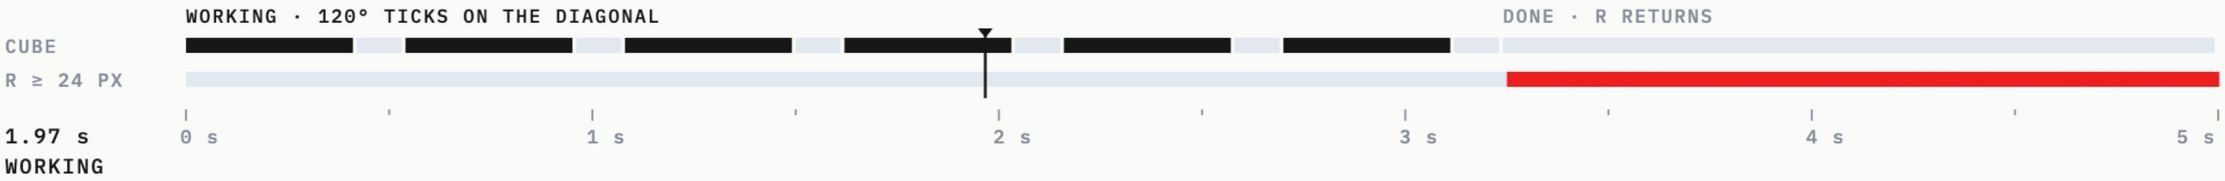

Working

A loader for agent runs. While agents work, the cube ticks 120° around its diagonal and every pause lands on the plain tile. When the run is done it settles and the R returns.

Day and night · R from 24 px up, never at 16

Ruby sharded

A whole ruby cube with fractures inside: six diagonal planes edge to edge, so each face shows only its diagonals, and three inner diamonds. Light meeting a fracture steeply is mirrored, so the planes flash red as it tumbles. Coming home the R opens.

Day · six diagonal fractures edge to edge, three inner diamonds; only diagonals reach the faces
